DETAILED ACTION

Allowable Subject Matter

1. Claims 1 – 12 are allowed.

The following is an examiner's statement of reasons for allowance:

Prior art of record does not teach or suggest a synchronous DRAM, divided into a plurality of logical blocks, with a plurality of mode storage units each of which correspond to a logical block to control operation modes of the logical blocks independently.

Closest prior art of record teaches a memory system with a plurality of physical memory banks, with each bank comprising an independent memory array with its own address decoder and a corresponding mode storage unit. However, while in some embodiments Applicant's logical block corresponds to a physical memory bank, Applicant's claimed logical block is one unit of a logical division of an independent memory array.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Rao (US Patent No. 6,173,356) discloses a memory system with a plurality of

SDRAM memory banks and a plurality of mode registers each of which is associated with its respective memory bank.
